MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 65 (1992)

1-Chloro-2,4-dinitrobenzene, glutathione *S*-transferase, mouse livers, age, 1,2-dichloro-4-nitrobenzene, protein-free diet, normal diet refeeding, 301

1,2-Dichloro-4-nitrobenzene, glutathione *S*-transferase, mouse livers, age, 1-chloro-2,4-dinitrobenzene, protein-free diet, normal diet refeeding, 301

Activation of aged mucosal T and B cells, signal transduction of aged mucosal T and B cells, secondary messengers of aged mucosal T and B cells, aging and interleukins in mucosal T and B cells, 290

Adenosine, barium chloride, pial vessel, closed cranial window, rat, aging, cerebral microvasculature, 257

Age, estrogen receptor, dissociation kinetics, 137

Age, glutathione *S*-transferase, mouse livers, 1-chloro-2,4-dinitrobenzene, 1,2-dichloro-4-nitrobenzene, protein-free diet, normal diet refeeding, 301

Age-related chromosome rejoining, premature chromosome condensation, 229

Ageing, *Podospora anserina*, radicals, alternative oxidase, laccase, 277

Aging, adenosine, barium chloride, pial vessel, closed cranial window, rat, cerebral microvasculature, 257

Aging, Alzheimer's disease, chromosomes, fragile sites, 9

Aging, ascorbic acid, exercise, lymphoproliferation, 177

Aging, graft versus host reaction, multiparity, 1

Aging, hexobarbital, enantiomers, hepatocytes, metabolism, stereoselective pharmacokinetics, 167

Aging, human T cells, *fos*, *jun*, peripheral blood lymphocytes, 149

Aging, membrane fluidity, anisotropy, polarization, dietary restriction, phospholipase A_2, lipid peroxidation, 17

Aging, mortality, epidemiology, Gompertzian analysis, 217

Aging, rat, digitalis toxicity, heart rate, arterial blood pressure, baroreceptor reflex, 199

Aging, senescence, damage, repair, evolution, Hayflick limit, 85

Aging, vasopressin, brain, 127

Aging and food restriction, trigeminal ganglion, calcitonin gene related peptide, neuron numbers, neuron size, Fisher 344 male rat, 111

Aging and interleukins in mucosal T and B cells, signal transduction of aged mucosal T and B cells, activation of aged mucosal T and B cells, secondary messengers of aged mucosal T and B cells, 290

Aging, phagocytic process, macrophages, physical activity stress, guinea pigs, 157

Aldolase, ontogeny, guinea pig, interactions, 35

Alternative oxidase, *Podospora anserina*, ageing, radicals, laccase, 277

Alzheimer's disease, aging, chromosomes, fragile sites, 9

Anisotropy, membrane fluidity, polarization, dietary restriction, aging, phospholipase A_2, lipid peroxidation, 17

Antioxidant enzymes, trace metals, glutathione, avian embryo, *Gallus gallus domesticus*, 51

Arterial blood pressure, aging, rat, digitalis toxicity, heart rate, baroreceptor reflex, 199

Ascorbic acid, aging, exercise, lymphoproliferation, 177

Avian embryo, antioxidant enzymes, trace metals, glutathione, *Gallus gallus domesticus*, 51

Barium chloride, adenosine, pial vessel, closed cranial window, rat, aging, cerebral microvasculature, 257

Baroreceptor reflex, aging, rat, digitalis toxicity, heart rate, arterial blood pressure, 199

Brain, vasopressin, aging, 127

Brain regions, superoxide dismutase, catalase, glutathione peroxidase, liver, rats, sex differences, 187

Catalase, superoxide dismutase, glutathione peroxidase, liver, brain regions, rats, sex differences, 187

Cellular aging, thermodynamics, stresses, WI-38 fibroblasts, ethanol, tert-butylhydroperoxide, 65
Cerebral microvasculature, adenosine, barium chloride, pial vessel, closed cranial window, rat, aging, 257
Calcitonin gene related peptide, trigeminal ganglion, neuron numbers, neuron size, Fisher 344 male rat, aging and food restriction, 111
Chromosomes, Alzheimer's disease, aging, fragile sites, 9
Closed cranial window, adenosine, barium chloride, pial vessel, rat, aging, cerebral microvasculature, 257
Cytochrome *b*, in vitro aging, WI-38 cells, quiescence, mitochondrial genes, NADH dehydrogenase, 239

Damage, aging, senescence, repair, evolution, Hayflick limit, 85
Dietary restriction, membrane fluidity, anisotropy, polarization, aging, phospholipase A_2, lipid peroxidation, 17
Digitalis toxicity, aging, rat, heart rate, arterial blood pressure, baroreceptor reflex, 199
Dissociation kinetics, age, estrogen receptor, 137

Enantiomers, aging, hexobarbital, hepatocytes, metabolism, stereoselective pharmacokinetics, 167
Epidemiology, aging, mortality, Gompertzian analysis, 217
Estrogen receptor, age, dissociation kinetics, 137
Ethanol, cellular aging, thermodynamics, stresses, WI-38 fibroblasts, tert-butylhydroperoxide, 65
Evolution, aging, senescence, damage, repair, Hayflick limit, 85
Exercise, aging, ascorbic acid, lymphoproliferation, 177

Fisher 344 male rat, trigeminal ganglion, calcitonin gene related peptide, neuron numbers, neuron size, aging and food restriction, 111
Fos, human T cells, *jun*, peripheral blood lymphocytes, aging, 149
Fragile sites, Alzheimer's disease, aging, chromosomes, 9

Gallus gallus domesticus, antioxidant enzymes, trace metals, glutathione, avian embryo, 51
Glutathione, antioxidant enzymes, trace metals, avian embryo, *Gallus gallus domesticus*, 51
Glutathione peroxidase, superoxide dismutase, catalase, liver, brain regions, rats, sex differences, 187
Glutathione *S*-transferase, mouse livers, age, 1-chloro-2,4-dinitrobenzene, 1,2-dichloro-4-nitrobenzene, protein-free diet, normal diet refeeding, 301
Gompertzian analysis, aging, mortality, epidemiology, 217
Graft versus host reaction, aging, multiparity, 1
Guinea pig, aldolase, ontogeny, interactions, 35
Guinea pigs, phagocytic process, macrophages, physical activity stress, aging 157

Hayflick limit, aging, senescence, damage, repair, evolution, 85
Heart rate, aging, rat, digitalis toxicity, arterial blood pressure, baroreceptor reflex, 199
Hepatocytes, aging, hexobarbital, enantiomers, metabolism, stereoselective pharmacokinetics, 167
Hexobarbital, aging, enantiomers, hepatocytes, metabolism, stereoselective pharmacokinetics, 167
Human T cells, *fos*, *jun*, peripheral blood lymphocytes, aging, 149

In vitro aging, WI-38 cells, quiescence, mitochondrial genes, NADH dehydrogenase, cytochrome *b*, 239
Interactions, aldolase, ontogeny, guinea pig, 35

Jun, human T cells, *fos*, peripheral blood lymphocytes, aging, 149

Laccase, *Podospora anserina*, ageing, radicals, alternative oxidase, 277
Lipid peroxidation, membrane fluidity, anisotropy, polarization, dietary restriction, aging, phospholipase A_2, 17
Liver, superoxide dismutase, catalase, glutathione peroxidase, brain regions, rats, sex differences, 187
Lymphoproliferation, aging, ascorbic acid, exercise, 177

Macrophages, phagocytic process, physical activity stress, guinea pigs, aging 157
Membrane fluidity, anisotropy, polarization, dietary restriction, aging, phospholipase A_2, lipid peroxidation, 17
Metabolism, aging, hexobarbital, enantiomers, hepatocytes, stereoselective pharmacokinetics, 167

Mitochondrial genes, in vitro aging, WI-38 cells, quiescence, NADH dehydrogenase, cytochrome *b*, 239
Mortality, aging, epidemiology, Gompertzian analysis, 217
Mouse livers, glutathione *S*-transferase, age, 1-chloro-2,4-dinitrobenzene, 1,2-dichloro-4-nitrobenzene, protein-free diet, normal diet refeeding, 301
Multiparity, aging, graft versus host reaction, 1

NADH dehydrogenase, in vitro aging, WI-38 cells, quiescence, mitochondrial genes, cytochrome *b*, 239
Neuron numbers, trigeminal ganglion, calcitonin gene related peptide, neuron size, Fisher 344 male rat, aging and food restriction, 111
Neuron size, trigeminal ganglion, calcitonin gene related peptide, neuron numbers, Fisher 344 male rat, aging and food restriction, 111
Normal diet refeeding, glutathione *S*-transferase, mouse livers, age, 1-chloro-2,4-dinitrobenzene, 1,2-dichloro-4-nitrobenzene, protein-free diet, 301

Ontogeny, aldolase, guinea pig, interactions, 35

Peripheral blood lymphocytes, human T cells, *fos*, *jun*, aging, 149
Phagocytic process, macrophages, physical activity stress, guinea pigs, aging 157
Phospholipase A_2, membrane fluidity, anisotropy, polarization, dietary restriction, aging, lipid peroxidation, 17
Physical activity stress, phagocytic process, macrophages, guinea pigs, aging 157
Pial vessel, adenosine, barium chloride, closed cranial window, rat, aging, cerebral microvasculature, 257
Podospora anserina, ageing, radicals, alternative oxidase, laccase, 277
Polarization, membrane fluidity, anisotropy, dietary restriction, aging, phospholipase A_2, lipid peroxidation, 17
Premature chromosome condensation, age-related chromosome rejoining, 229
Protein-free diet, glutathione *S*-transferase, mouse livers, age, 1-chloro-2,4-dinitrobenzene, 1,2-dichloro-4-nitrobenzene, normal diet refeeding, 301

Quiescence, in vitro aging, WI-38 cells, mitochondrial genes, NADH dehydrogenase, cytochrome *b*, 239

Radicals, *Podospora anserina*, ageing, alternative oxidase, laccase, 277
Rat, adenosine, barium chloride, pial vessel, closed cranial window, aging, cerebral microvasculature, 257
Rat, aging, digitalis toxicity, heart rate, arterial blood pressure, baroreceptor reflex, 199
Rats, superoxide dismutase, catalase, glutathione peroxidase, liver, brain regions, sex differences, 187
Repair, aging, senescence, damage, evolution, Hayflick limit, 85

Secondary messengers of aged mucosal T and B cells, signal transduction of aged mucosal T and B cells, activation of aged mucosal T and B cells, aging and interleukins in mucosal T and B cells, 290
Senescence, aging, damage, repair, evolution, Hayflick limit, 85
Sex differences, superoxide dismutase, catalase, glutathione peroxidase, liver, brain regions, rats, 187
Signal transduction of aged mucosal T and B cells, activation of aged mucosal T and B cells, secondary messengers of aged mucosal T and B cells, aging and interleukins in mucosal T and B cells, 290
Stereoselective pharmacokinetics, aging, hexobarbital, enantiomers, hepatocytes, metabolism, 167
Stresses, cellular aging, thermodynamics, WI-38 fibroblasts, ethanol, tert-butylhydroperoxide, 65
Superoxide dismutase, catalase, glutathione peroxidase, liver, brain regions, rats, sex differences, 187

Tert-butylhydroperoxide, cellular aging, thermodynamics, stresses, WI-38 fibroblasts, ethanol, 65
Thermodynamics, cellular aging, stresses, WI-38 fibroblasts, ethanol, tert-butylhydroperoxide, 65
Trace metals, antioxidant enzymes, glutathione, avian embryo, *Gallus gallus domesticus*, 51
Trigeminal ganglion, calcitonin gene related peptide, neuron numbers, neuron size, Fisher 344 male rat, aging and food restriction, 111

Vasopressin, brain, aging, 127

WI-38 cells, in vitro aging, quiescence, mitochondrial genes, NADH dehydrogenase, cytochrome *b*, 239
WI-38 fibroblasts, cellular aging, thermodynamics, stresses, ethanol, tert-butylhydroperoxide, 65
